Address: House#43,44, 2nd floor, Block#B, 1-Kha, Kazifuri, Gudaraghat, Shah Ali thana, Mirpur-1, Dhaka - 1216, Bangladesh

## EXPERIENCE

FREELANCE SOFTWARE  
ENGINEER  
Dec, 2020 - Present

DATA DRIVEN WEBSITE, DHAKA BANGLADESH

- Built Laravel and Vuejs-based CMS products to serve corporations to re-brand corporate services. Person can manage the content quickly comparing to other popular CMSs.
- Implemented a Laravel-based, data-driven, loosely coupled SEO tools infrastructure and integrated it to make the website SEO friendly. It doubles the business possibilities for company.
- Unlimited depth of Category, Sub-category system for menus and Category management is implemented, which can be the clean and foundational starting point to manage large e-commerce product categories.
- Perform better than other popular CMSs. The developer will get more control over the system and can expand it as a web application. The person can also convert the design to API.

SOFTWARE ENGINEER  
TEAM LEAD  
Apr, 2019 - Nov, 2020

COMPUTER NETWORK SYSTEMS LIMITED, DHAKA BANGLADESH

- Assigned to a 3,000,000.00 (three million) USD valuation project.
- Played a team lead role build the project architecture. The common boilerplate initializes every new project with zero lead time for team collaboration.
- Personnel Information Management System, Online Recruitment System, Provident Fund, Pension and Loan Management System, Electricity and Water Billing, Incident Management System, Watchman Management System, and Document management system are the modules I contributed to the system from requirement analysis to serve the end client.
- Solved complex and critical problems like BI publisher integration with Laravel. It speeds-up to build the simple to complex reports! Minimum (90x8x3) person-hour saved for this implementation. Now all other projects are considering this solution as de-facto for reporting.

SOFTWARE ENGINEER  
May, 2012 - Jan, 2018

CODEMATE LIMITED, DHAKA BANGLADESH

- Developed multiple admin module features like role management, RBAC, and billing module.
- Have worked with Oracle full-text search features with XML and XSLT for multiple existing projects for a client, which was the sole purpose of continuing the projects with my employer.
- Tie up with the end client on another project idea about lightweight entrepreneurship's invoice and billing solution. Specifically, expenses and travel-costs features are developed to generate the invoice automatically. We help to expand the business from one region to multiple regions: Finland, Sweden, Estonia and Russia.
- Custom solution for CSS and js compilation and minification has been integrated, and it saved man/day of brute-force human activity for every production deployment.
- Actively did code refactoring and code review for multiple projects. I have also discussed with clients requirement analysis and solution design.
- Developed paid subscription-based newsletter solution for different types of customers.

## PORTFOLIO
